A DUO OF CAREFULLY CHOSEN ACTIVE INGREDIENTS FOR OPTIMUM SAFETY AND EFFICACY

In order to attain the desired result whilst being gentle on the skin, each FILORGA peeling product combines a duo of active ingredients to provide:

TARGETED EFFECTS

thanks to a carefully chosen acid

In addition to their keratolytic functions, the active ingredients contained in superficial peeling products possess specific properties. Each FILORGA peeling product therefore contains the ideal acid for the desired result: glycolic acid, mandelic acid or pyruvic acid.

OPTIMUM TOLERANCE

thanks to gluconolactone

Obtained from glucose, this extremely well-tolerated active ingredient counteracts the signs of skin ageing in all skin types, even the most sensitive. (Study by Edison, Green, Cutis 2004)

FILORGA PEELING PRODUCTS, A TARGETED FORMULA FOR EACH SKIN TYPE

TIME PEEL®

NORMAL SKIN

Indications: Wrinkles, firmness, radiance.

Active ingredients: Peel complex 50%:
Gluconolactone + Glycolic acid. pH ≈ 1

BALANCE PEEL®

COMBINATION TO OILY SKIN

Indications: Skin texture, pores, imperfections, superficial marks.

Active ingredients: Peel complex 50%:
Gluconolactone + Pyruvic acid. pH ≈ 1

LIGHT PEEL®

SENSITIVE SKIN

Indications : Fine lines, dull complexion, radiance.

Active ingredients: Peel complex 20%:
Gluconolactone + Mandelic acid. pH ≈ 3

A CLINICALLY TESTED RANGE

APPLICATION

Protocol clinically tested during 4 sessions each 2 weeks apart.

STEP 1: Skin preparation

Apply FILORGA PRE PEEL uniformly to the area to be treated using a cotton pad or a compress in order to balance the skin pH.

STEP 2: Peel application

Pour 2,5 to 3 ml of peeling solution into the dispenser tube. Apply the peeling solution using a brush over the entire area to be treated. Leave on for 3 minutes.

STEP 3: Neutralization

Apply FILORGA POST PEEL using a cotton pad or a compress. Rinse with a cotton pad or a compress soaked in water.

Protect the eyes and do not apply on mucous membranes.
